

**A Fintech platform focusing on Verifying,
Managing & Monetizing Online Identity**

KABN makes the verification of Digital Identity easy and continuous, a process that has traditionally been a highly transactional service, repeating the process over and over again, causing “friction” for the Consumer who has to verify themselves to multiple parties. KABN provides Consumers with a “no cost” service that helps them manage their private and public identity and works with them to create value that benefits both the Consumer and KABN.

KABN Systems North America Inc. is a Fintech platform in Canada and the United States operating a robust, scalable suite of financial technologies and digital identity services that provides:

Verification

Provides low-cost verification and continuous validation services to commercial clients with it's "Always On" ID monitoring so they can rest assure their clients are who they say they are.

Management

Empowers consumer clients to manage their identity attributes and attestations securely with proprietary, blockchain technology

Monetization

Consumer clients are provided with offers and services that meet their specific needs such as financial services, cards & loyalty programs.

Primary Product Offering

The KABN Network is an integrated suite of financial services for our Customers that includes:
